GOLDFLAME HONEYSUCKLE

(Trademark)

A superlative variety; beautiful, hardy and versatile. The large flame-coral trumpets lined with gold, fragrant after nightfall, appear in immense, showy clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it nevertheless flowers abundantly from May until frost. Dark blue-green foliage, disease and pest free, is attractive in itself and makes a perfect background for the brilliance of the flowers.

Allowed to grow naturally, GOLDFLAME will climb a trellis or spread as a ground cover; if pruned it becomes a striking specimen shrub, while if planted in a row and sheared it gives a smashing effect as an everblooming hedge.

VELVET GRASS

A Beautiful New Lawn Grass!!

Velvet grass two months after planting in our nursery

- Has the density of Bermuda Grass and the beauty of Blue grass.
- Drought resistant and likes hot weather. Chokes out dandelions and other weeds.
- Rapid growing, giving complete coverage the same season it is planted.
- Dense turf of dark green. The foliage is very fine.
- Hardy in Kansas the past eight years. Was not injured by the November 1940 freeze
- Recommended only for locations that receive considerable sunlight.

Planting-time—should not be planted until warm weather, usually after May 1st.

Plant as you would Bermuda, with stolons in rows or in sod squares, (plugs). Water well until established. Clean-cultivate ground until covered with grass. Mow frequently and fairly short.

One square yard of sod is sufficient to plant from 300 to 400 square feet of lawn, depending upon how thick you want to plant. (We will remove the soil before shipping if you prefer.)

1 to 5 yards	-----	3.00	per yard
5 to 10 yards	-----	2.50	" "
10 yards and up	-----	2.00	" "

Orders for less than 1 square yard will be invoiced at 50c per square foot.

Our New Butterfly Bush

Floralart

TRADE MARK

The outstanding characteristic of this new Butterfly Bush is the fullness of the bloom. The flower spikes of most varieties of Butterfly Bush start blooming at the base and open progressively until they bloom out at the tip. By this time, the flowers at the base have faded so that at no one time is the flower spike in full bloom. FLORALART blooms over the entire spike at the same time and the spike is almost as broad at the top as at the base. These characteristics make FLORALART of outstanding merit for florists use, as well as for garden and home decoration. The color is a clear rose-purple and the flower sprays, even on young plants, are often a foot or more in length. The plants are strong growers.

Planting for Post-War Business

No one knows when the war will end—we all hope soon. But that it will end, and end victoriously for the United Nations appears certain now.

Post-war planning is the order of the day. All forward-looking business men are working out definite plans for the development of their business to meet civilian demands. There is every indication that the nursery business will become greater than ever. Real estate experts predict that hundreds of thousands of new homes will be required after the war, thus creating an enormous new market for nursery stock. The nurseryman who is ready to supply this demand will profit handsomely.

Have you made your plans? Have you kept up your production or has your stock run down like that of so many other nurserymen? Now is the time to begin building it back with increased plantings. On pages 26, 27 and 28 of this catalog you will find a list of lining-out stock. Look it over now and place your order today for what you need.
